GRASS VALLEY GROUP

Grass Valley Group **Bravo** Family brings Quality and Compatibility to Utility Routing

The Grass Valley™ Bravo™ Series is a family of 16x2 utility routers that feature solid, broadcast-quality routing in a compact 1 RU frame. Bravo routers feature the same high-quality components found in all Grass Valley routing products. Bravo routers are available with an integrated control panel for local control or with a blank panel for remote operation. Additionally, an optional control panel is available for controlling a Bravo router from a remote location within a facility. Bravo Series routers individually support analog video, serial digital video, analog (stereo) audio, AES/EBU digital audio, and high-definition signals. The line also includes a 32 port-switch data router.

Bravo Series routers are easy to configure using a standard Internet browser application. They also use a subset of the Grass Valley Group's Encore™ scalable facility control system that provides much of the reliability and scalability of a full-featured control system at a fraction of the price. Bravo Series routers can be easily integrated into larger facility routing systems and are completely compatible with the Series 7000 control systems as well as many other third-party routing control systems.

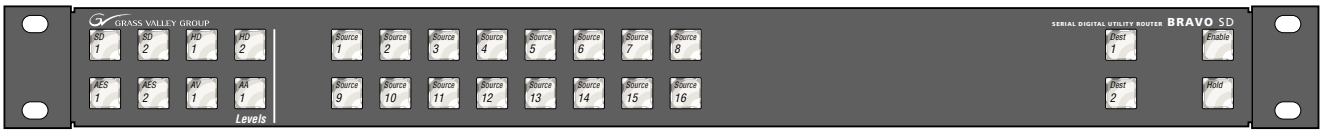

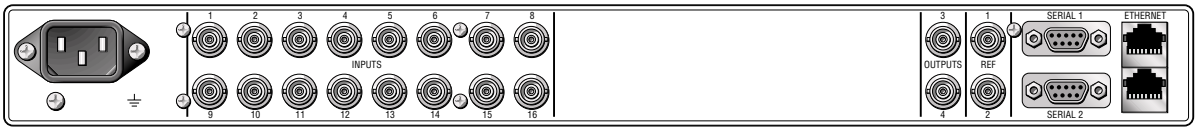

Facility Fit

Bravo Series routers are an excellent choice for utility routing requirements such as on-air emergency bypass control, dubbing and monitoring applications, tape and disk duplication and monitoring, and video surveillance. Because of its quick and easy browser-based configuration, the line is as well suited to small independent producers as it is to post-production houses and broadcasters.

Key Specifications

- Compact, efficient design in a 1 RU frame
- Individual routers support analog video, serial digital video, analog (stereo) audio, AES/EBU digital audio, and high-definition signals
- 16 inputs and 2 outputs
- Local panel or remote control
- Easy, browser-based configuration and setup
- Compatible with Encore scalable facility control system and Series 7000 control system

About Grass Valley Group

The Grass Valley Group knows more about high-quality video than anybody else—especially as video goes digital. The Internet. Digital cinema. Data-enhanced broadcasting. Interactive television. It's a world of Digicasting—one that demands Media Without Bounds™ solutions. Whether online or on the air, the Emmy® award-winning Grass Valley Group, a privately held digital media leader, has the hardware, software, and new media technologies to get content wherever it needs to go.
